## <u>Category 5</u> - Computer Hardware Peripherals

A peripheral is a device attached to a host, but not part of it, and is more or less dependent on the host. It expands the host's capabilities, but does not form part of the core computer architecture. I.e. Monitors, smart monitors/screens, sound systems for desktops, mice, pointing devices, IP cameras for desktops, data storage devices (stand alone or installed in computer case), printers.
